

THE UNIVERSITY OF MISSISSIPPI SCHOOL OF PHARMACY

PGY-2 AMBULATORY CARE PHARMACY RESIDENCY

JACKSON, MISSISSIPPI PRACTICE EXPERIENCES

Overview

The PGY-2 Ambulatory Care Residency program at the University of Mississippi School of pharmacy is a longitudinal-based experience that allows the resident to build long-term relationships with providers, staff, students, and patients. Each learning experience is scheduled on either a half or full day every week for 3, 6, or 12 months. The resident is offered a variety of practice settings to broaden their patient care experience and enhance their ability to care for multiple chronic disease states. In addition to clinical experiences, the School of Pharmacy provides the resident with opportunities for small group, didactic, and experiential teaching.

University of Mississippi Medical Center

The University of Mississippi Medical Center (UMMC) is an academic medical center that provides advanced medical services to patients from all over the state. UMMC offers specialty clinics for a wide variety of disease states. Currently, the resident will have longitudinal learning experiences in the following clinics: anticoagulation, cardiometabolic, family medicine, heart failure and cystic fibrosis. Through this partnership, other specialty clinics can be offered based on the interest of the resident.

Cystic Fibrosis Clinic

Through a grant from the Cystic Fibrosis Foundation, the residents will take part in developing a newly developed and actively growing service in the adult and pediatric cystic fibrosis clinics at UMMC. This clinic operates in a team-based approach to care, and offers great opportunities for collaboration on research. In addition, the resident will have precepting responsibilities for IPPE and APPE students.

Private Physician Clinic

This experience at the Diabetes Care Group incorporates the resident into a team-based approach to patient care. The clinic focuses on the management of diabetes utilizing innovative treatment strategies in a primarily insured patient population.

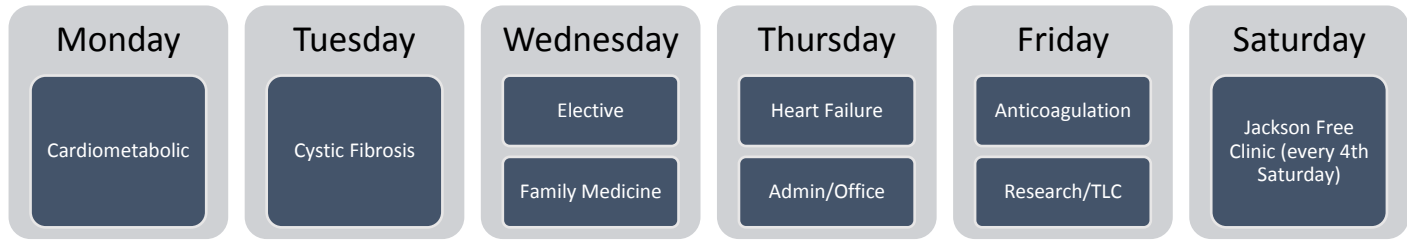

Teaching and Learning Curriculum

The resident will develop facilitation skills in problem-based learning (PBL), participate in didactic lectures, and co-precept in experiential rotation settings. The resident will learn all aspects involved in educating pharmacy students on experiential rotations, including the following: co-facilitation of pharmacy students (both IPPE and APPE) within a clinical practice; facilitating discussion sessions, journal club sessions, and presentations; assisting in giving feedback; and grading. Additionally, residents will learn all aspects involved in facilitating PBL experiences for pharmacy students in the third professional year. The resident will be involved in committee assignments for the Problem Solving and Knowledge and Comprehension Committees where they will assist in writing and reviewing exam questions, grading, and proctoring exams. Further development in academia is available to the resident through the Teaching Certificate Program offered by the School of Pharmacy.

Leadership Experience

This required experience provides the resident with an opportunity to grow and develop leadership skills, and prepares the resident with the tools needed for success in a variety of settings.

Sample Schedule

Salary and Benefits

The resident receives health insurance, major holidays, sick leave, and professional travel reimbursement
