APPE Community PRCT 553 Asthma Management

Directions: Identify one patient currently on an inhaler for treatment of asthma. Answer the questions below.

Review the patient's drug profile. How long has the patient been using an inhaler? (Question 1 of 4 - Mandatory)

Has the patient been prescribed a long-term control medication and a rescue medication? Remember to ask the patient if he or she gets medications filled at any other pharmacy. (Question 2 of 4 - Mandatory)

Ask the patient when his or her next follow up visit is. How often does the patient refill his or her rescue medication? Remind patient of adverse effects and importance of frequent self-monitoring. Does the patient currently have an action plan? Follow up with prescriber if needed. Report your findings below. (Question 3 of 4 - Mandatory)

Review the proper technique for inhaler use with the patient. Describe your interaction below. (Question 4 of 4 - Mandatory)
