Activity: Patient Care Project

Directions: Participate in at least one patient care activity while on your rotation. If there is another student on your rotation, you may work together. Some examples are listed below. Once the project is completed, provide a thorough description below and answer the questions that follow.

1) Offer to check patient’s blood pressure whenever they fill or refill a prescription for hypertension.
2) Call patients a few days after they fill a prescription for an antibiotic and see if they are getting better.
3) Whenever a patient refills a prescription for warfarin, ask when and what was his or her last INR.
4) Ask patients who fill prescriptions for insulin about their latest HbA1c and their most recent blood glucose readings.
5) Host a health education fair in the pharmacy.
6) Create a patient information pamphlet or poster.
7) Participate in immunizations advocacy (pneumococcal, shingles, HPV, influenza, B-12). Administer these immunizations if possible.
8) Create “My Medications List” for patient’s chronic medications and give it to the patients.
9) Create an education poster focusing on over-the-counter products (cold medication ingredients, safety, indications, etc).

Project name:

Description:

How long did you spend organizing and executing this activity?

What was the patient response?

ACPE Pre-APPE Core Domains: Health and Wellness (Key Elements 2.3, 2.4).
Core Entrustable Professional Activities: Population Health Promotor Domain-Maximize the appropriate use of medications in a population and Ensure that patients have been immunized against vaccine-preventable disease.
